D.P.U. 98-PGAF-SAMPLE

Petition of Sample Gas Company for approval of its Peak Period Gas Adjustment Factor

ORDER ON PEAK PERIOD GAS ADJUSTMENT FACTOR — October 30, 2025

The Department has reviewed the Company's filing and responses to information requests. In its next peak period filing, the Company shall include a typical bill impact analysis for each rate class, including residential and C&I customers.

The Company shall provide monthly detail supporting any prior-period reconciliation balance as Attachment DPU-1-2, in Excel format with formulas intact.

The Company is directed to report the percentage of forecast winter supply that is hedged and the weighted average hedge price.

The Department approves a residential Local Distribution Adjustment Factor of $0.4310 per therm, effective November 1, 2026.

The Company shall include Schedule 4, a summary of its hedging program, with each annual filing.

Accordingly, after due notice, hearing and consideration, it is

ORDERED: That the C&I low load factor (G-51) Gas Adjustment Factor shall not exceed $0.8200 per therm for the 2026-2027 peak period; and it is

FURTHER ORDERED: That Sample Gas Company shall file its 2026-2027 peak period filing no later than September 1, 2026.

By Order of the Department (fictional).
